

# COVID 19 UPDATES

We have always prioritized the comfort and safety of your child and our commitment to continuing that philosophy remains the same. Our office environment and procedures have been enhanced according to the most recent CDC and OSHA standards of infection control.

## COVID 19 PRESCREEN

You will receive a text to fill out a wellness survey to screen your health status within 48 hours of your appointment. We ask that you complete the questions to ensure that all persons in the office are asymptomatic. Staff are also screened on a daily basis.

## CURBSIDE CHECK IN

When you arrive for your appointment, simply call/text our office from your cell phone from our parking lot to alert us of your arrival. We will text you when we are ready for you to come into the office. This will reduce your time spent in our reception room and allow for social distancing

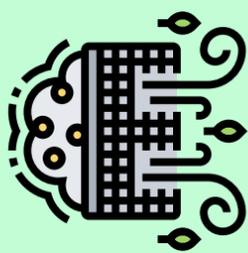

## PATIENT CHECK IN

Upon check-in, we will assess everyone's temperature with an infrared 'no touch' thermometer and ask that you hand sanitize. We also ask everyone entering the office to wear a mask at all times. Did you know that if everyone wore a mask, the risk of transmission is 1%?

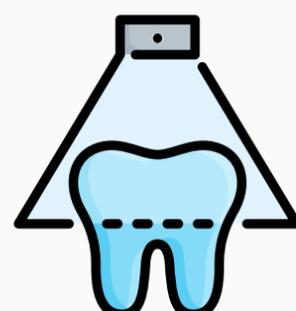

## ULTRA HEPA FILTERS

You will notice IQAir filters placed throughout the office. While most home filters can remove particles of 0.03 microns, viruses are smaller at 0.01 microns. IQAir are medical grade filters that have the capacity to filter 99.5% of particles down to 0.003 microns, ensuring that the office is free of mold, bacteria, and viruses

## SOLEA LASER

Not only is the Solea able to deliver anesthesia free dentistry for our patients, the Solea is also able to deliver that treatment safely and than a traditional handpiece, creating 99% less aerosol and splatter. The Solea also kills all bacteria and viruses on contact, reducing the number of pathogens in the oral cavity

## DISINFECTION/FOGGING

All operatories and office surfaces are sanitized through out the day following OSHA guidelines with eco-friendly disinfectants that are natural and safe for the skin. As an additional safety feature, the office is also fogged daily with hypochlorous acid, which kills airborne as well as hard surface pathogens.

## STAFF PROTECTIVE MEASURES

Our team will have disposable gowns and face shields on for many of our procedures. Team members disinfect their personal protective equipment in between patients to guard against spread of diseases

## BYOT (BRING YOUR OWN TOYS)

All toys, books, magazines, and hard to clean have been temporarily removed at this time. Please bring your child's favorite toys or iPad with them to the appointment if you wish

## SCHEDULING

We kindly ask for your continued patience as our team schedules your appointment. We are adjusting our daily schedule to ensure everyone's safety, and we also have patient care that needs to be rescheduled from the our office closure. Our community is looking forward to getting our lives back to normal. While many things have changed, one thing has remained the same: our commitment to the of well-being of your child
